

## CMS Lite Requirements and Installation Instructions

### CPU requirements

- Laptop Computer
- 2 USB ports
- Disk drive – either internal or external
- Ethernet port
- Minimum 500 GB internal storage
- 4 GB Memory

### Installation

#### • Create Partition

- Open Computer Management by selecting the Start button. Then select Control Panel > System and Security > Administrative Tools, and then double-click Computer Management.
- In the left pane, under Storage, select Disk Management.
- In the Disk Management screen, just right-click on the partition that you want to shrink, and select "Extend Volume" from the menu
- Locate your system partition — usually the C: partition. Right-click on it and select "Shrink Volume." If you have multiple partitions on your hard drive, you could also choose to resize a different partition to free up space.
- Rename now unallocated space as D:

#### • Install CMS

- Insert Disk
- Make sure logged in as Administrator
- Turn off WiFi
- Open Disk, select Setup from folder
- Disable Windows Defender and any other Firewall

- **Connect Monitor to CMS Software**

- Make sure the computer is not connected to the internet.
- Plug in the TPLink Router power to the router and the USB port on the computer.
- Connect the ethernet cable to the router and to ethernet port on the computer. Ethernet connection should show monitor. Double click on connection. Scroll down and make a note of IPv4 IP address
- On the Edan Monitor – Go to Maintenance – User Maintain – Password ABC – OK –
- Scroll down to Network Maintain
- Set Server IP – Should be whatever CPU IPv4 address
- For Network Type choose Wi-Fi – Click on Config
- Choose “EdanMonitor”
- Make sure IP Address is set to Auto
- Enter Password on router box – SEDATION
- Click on the connect icon in the top right corner
- Open CMS Lite on the Computer
- Click Admission Icon – Select check box beside the Bed No – Click Admission
